

Your home, your independence

T.M. Browne offers a total aids and adaptations service from start to finish – so you can keep your independence *and* your home!

We all want to enjoy our homes, but if you're finding it increasingly difficult to move about in your home, we can help to make things easier by making some reasonably simple changes. For example, the straightforward installation of grab rails and stair rails can quickly make your home more accessible.

Accessible doesn't just mean being able to get in and out of your property by replacing steps with a ramp – it means being able to live in your home in the same way as everyone else and retain your independence, whether that's a case of widening a few doors or completely adapting your bathroom.

In addition to our construction and building maintenance work, T.M. Browne have been doing these types of

aids and adaptations for over 10 years now – for private homeowners, for local housing associations, and through a framework agreement with the council-led Care & Repair initiative.

Over the years, T.M. Browne has built a well-respected reputation across the region for the high quality of our work and the amount of care we take when working in people's homes – from installing larger toilets and level-access showers to installing lifts, safer floors, and fitting bed raisers and hoists.

And although such work sounds

expensive, it doesn't have to be a costly solution to enjoying your home to the full; funding and grants are available for aids and adaptations depending on your circumstances, and the ideal place to start to discover if you qualify for

financial help is to speak to an Occupational Therapist – who will assess your needs and recommend the most suitable equipment. For over 30 years T.M. Browne has been caring for people and their properties – if you'd like to learn more about our aids and adaptations services, please contact us using the details below.
