

A new approach to new builds...

T.M. Browne offers a complete new-build service that includes everything you need to get your grand design off the ground!

For over 30 years T. M. Browne has been caring for people and their properties – and the company's new-build capabilities are just one component of a comprehensive range of building, construction and maintenance services.

The company was founded back in 1985, establishing a strong reputation for high standards of craftsmanship and attention to detail; a reputation that helped T.M. Browne win the tender for its first new-build project in 2013 – two semi-detached homes in Castle Acre and two in Dersingham for a local housing association.

Essentially the projects were 'design and build' packages, meaning that the multi-skilled team at T.M. Browne were responsible for virtually everything in

seeing the plans come to life – from liaising with architects to employing structural engineers and all the relevant professionals, overseeing everything from soil investigations to floors and roof trusses.

Over the last four years T.M. Browne has (quite literally) built on its new-build expertise, and in the last year alone has worked on over 20 properties in the local area; completing six in King's Lynn, seven in North Wootton, and the company is now putting the finishing touches to a further nine properties adjacent to those.

This experience had even led to the founding of a specialist division of the

business called T.M. Browne Developments, which purchases land, develops new-build projects and then sells the properties, generally on an off-plan basis – giving homeowners the opportunity to choose their own kitchens and carpets, and even have built-in white goods if required.

If you have a plot of land you're looking to develop, if you're considering re-building or developing your existing home, or if you're interested in buying some land for development, please contact T.M. Browne using the details below and we'll help you get your grand designs off the ground; successfully and on-budget. Discover a new approach to new-build properties with T.M. Browne.
